**Gateways connect with TAG**  
fleet to provide powerful analytics  
and 24hr security delivered via:  
SMS | Email | Push Notifications

# Designed to prevent loss and save money, here is how we do it.

## Monitor Assets

Our real time location system allows visibility of assets whilst on and off-site.

## Last Known Location

Separation alert will notify the staff / contractor and head office before the assets are left behind. The items last

## Check in / Check Out

The App will identify that an asset is in custody of staff / contractor, they must then 'accept custody' within app, to

## Geo Fence / Safety Zone receiver req.

Receive alerts whenever Asset TAG is in proximity of your defined safe and danger zones.

## Paperless Staff Tracking receiver req.

Automated centralised Staff check-in and check-out records. You can also push data to your staff management and payroll system.

## 24Hr Asset Security receiver req.

Assets on premises are secured by Bluetooth receiver. Should any item leave the facility without a registered staff member, emergency SMS alerts

## Smart Reporting & Analytics

Our system performs stock-take procedures at the end of each day. Alerts will be sent to management if anything is missing in the report.

## Historical Activity Log

Records of assets historical activities including locations and time with particular staff or contractors.
